

# Insurance Industry Payments & Data Security Compliance

simplifying payments

## Data compliance obligations for the insurance industry

The insurance industry is facing many challenges when it comes to payment technology and data security compliance. Finding the right balance between meeting data security compliance obligations, modernising legacy payment systems and managing changing customer expectations isn't easy.

Data security compliance obligations are also changing regularly, with insurers coming under increasing focus due to the sensitivity of the data they transmit, manage and store.

The threat of data breach is real and on-going. Governments and regulators are responding with new security compliance obligations that affect insurers, including:

- APRA Information Security Standard CPS 234 - Australia
- Notifiable Data Breach Scheme - Australia
- General Data Protection Regulation (GDPR) - Europe
- Payment Card Industry Data Security Standards (PCI DSS) - Worldwide

APRA's CPS 234 Standard commenced on 1 July 2019 and by 1 July 2020, if any information assets managed by a third party Insurers must ensure these third parties are CPS 234 compliant.

## Can you afford the risk?

**\$2.2 million**  
Average total cost of a data breach

**\$110 per card**  
Average cost per stolen record

## IPSI helps insurers meet compliance challenges.

IPSI's insurance industry experience, coupled with a comprehensive package of payment channels, allows insurers to modernise and transform the customer payment experience while reducing their security compliance burden.

### Outsource your security compliance burden.

IPSI's Level 1 PCI DSS compliant payment solutions remove the burden of achieving and maintaining PCI DSS and APRA security compliance.

### Improve the contact centre experience

Remove your contact centre from your PCI DSS compliance scope while reducing call handling times and increasing payment success rates.

### Streamline your payment processing

Build a highly secure and flexible customer-centric payments capability which delivers all the strategic benefits associated with strategic bank independence.

### Greater flexibility and customisation options

Complex banking integrations and legacy systems are no longer a barrier to building a highly secure and flexible customer-centric payments capability.

## Key Features

**Compliance.** All solutions are Level 1 PCI DSS and APRA compliant, reducing the time, effort and costs associated with PCI DSS compliance, PII and privacy legislation compliance.

**Security.** All credit card and PII data is stored within Australia, ensuring protection from overseas governments and the issues associated with lax security legislation.

**Flexibility.** Our service flexibility and diverse range of highly customisable integration options minimise the typically re-engineering required to implement complex e-payment banking integrations.

**Connectivity.** IPSI's multi-bank connectivity enables seamless switching of financial institutions and puts you back in control of your payments strategy.

**Reporting.** Improve your payments visibility with detailed reporting and graphical functionality.

**Integration.** Easy integration with existing front-end systems and legacy technology.

**Contact Centre.** Increase customer confidence and payment success rates while reducing security and compliance costs.

**Experience.** IPSI has managed some of Australia's largest payment security projects helping insurers meet their security and e-commerce objectives.

# About us

simplifying payments

The IPSI team have helped ASX top 50 and fortune 500 companies implement best-of-breed payment technology that bridges the gap between traditional payment and banking products and the companies unique requirements.

The rapid growth of digital commerce has meant that payment capability, PCI DSS compliance, cybersecurity and storage of sensitive data is a crucial consideration when assessing payment technology.

IPSI has been part of this growth, successfully providing highly flexible payment and data security solutions to enterprise-level clients for over 10 years. The IPSI team has managed some of Australia's largest e-commerce and PCI DSS tokenisation projects.

Services range from cloud-based payment processing, tokenisation services, contact centre payment solutions, flexible mobile and pay-by-phone (IVR) services, PII data scanning and storage to PCI DSS remediation solutions.
